

Receiving a Message

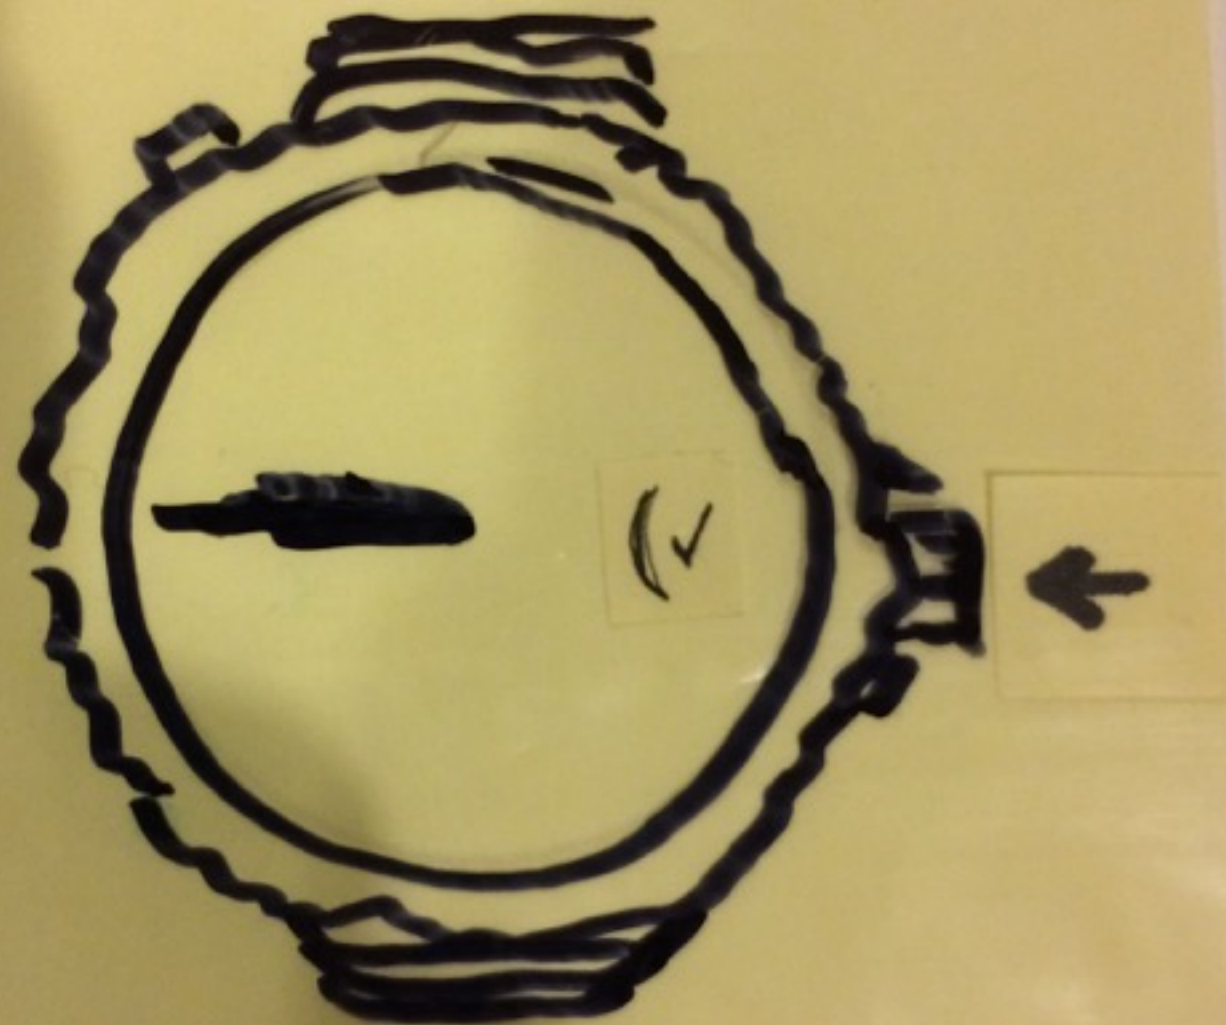

Phone vibrates to
indicate an incoming
message.

Bond raises his wrist.
The hands move out of
the way and the
message is shown on
the face. Icons
indicate what the
physical buttons do.

Bond confirms receipt of the messages, dismisses and archives it by pressing the right button.

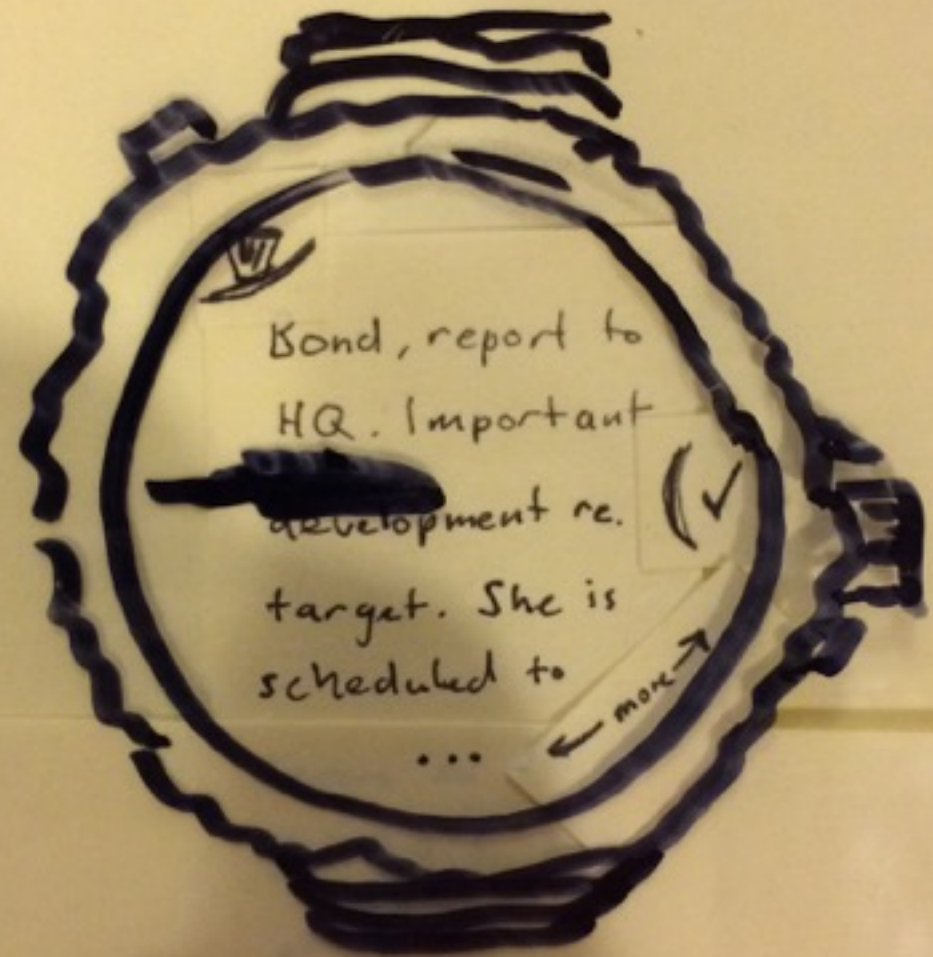

Alternatively...

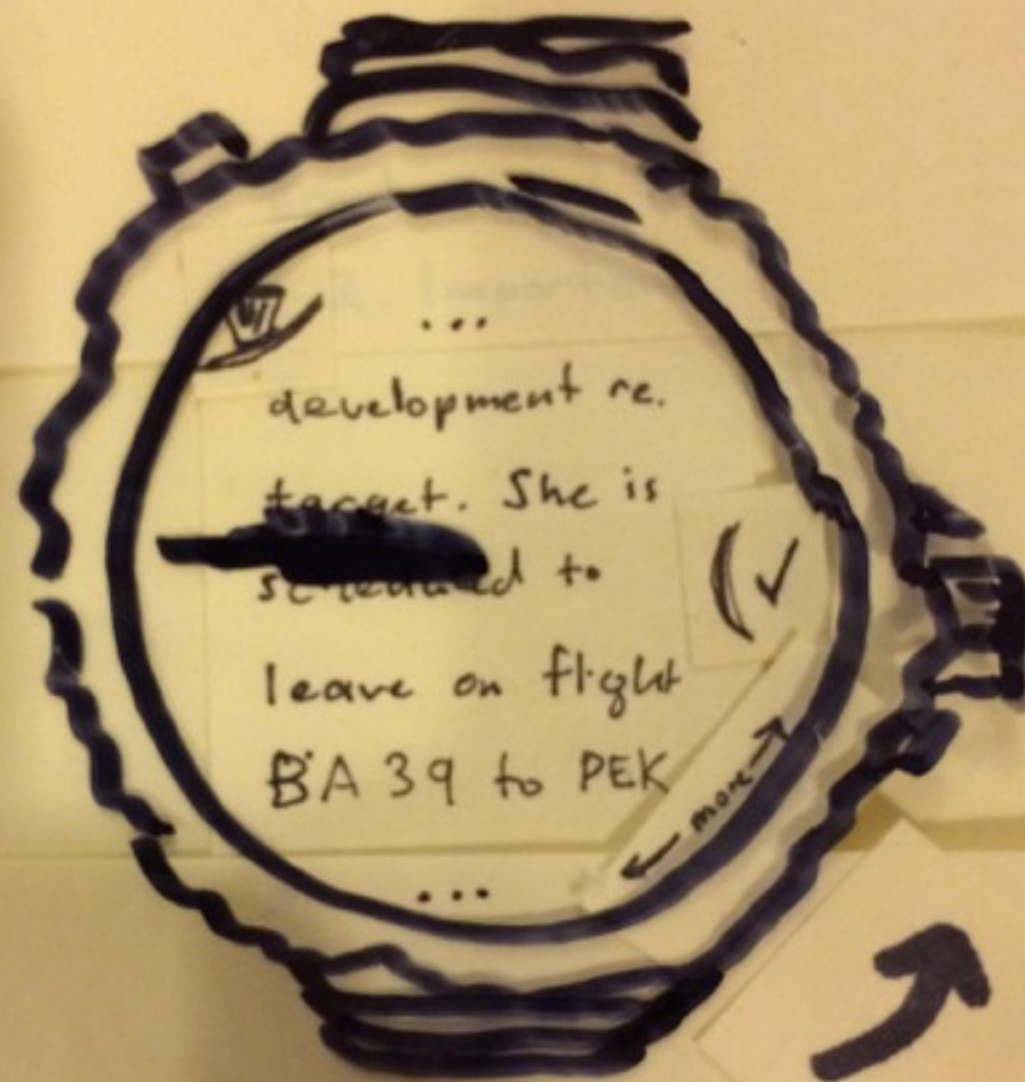

Bond trashes the message by pressing the top button.

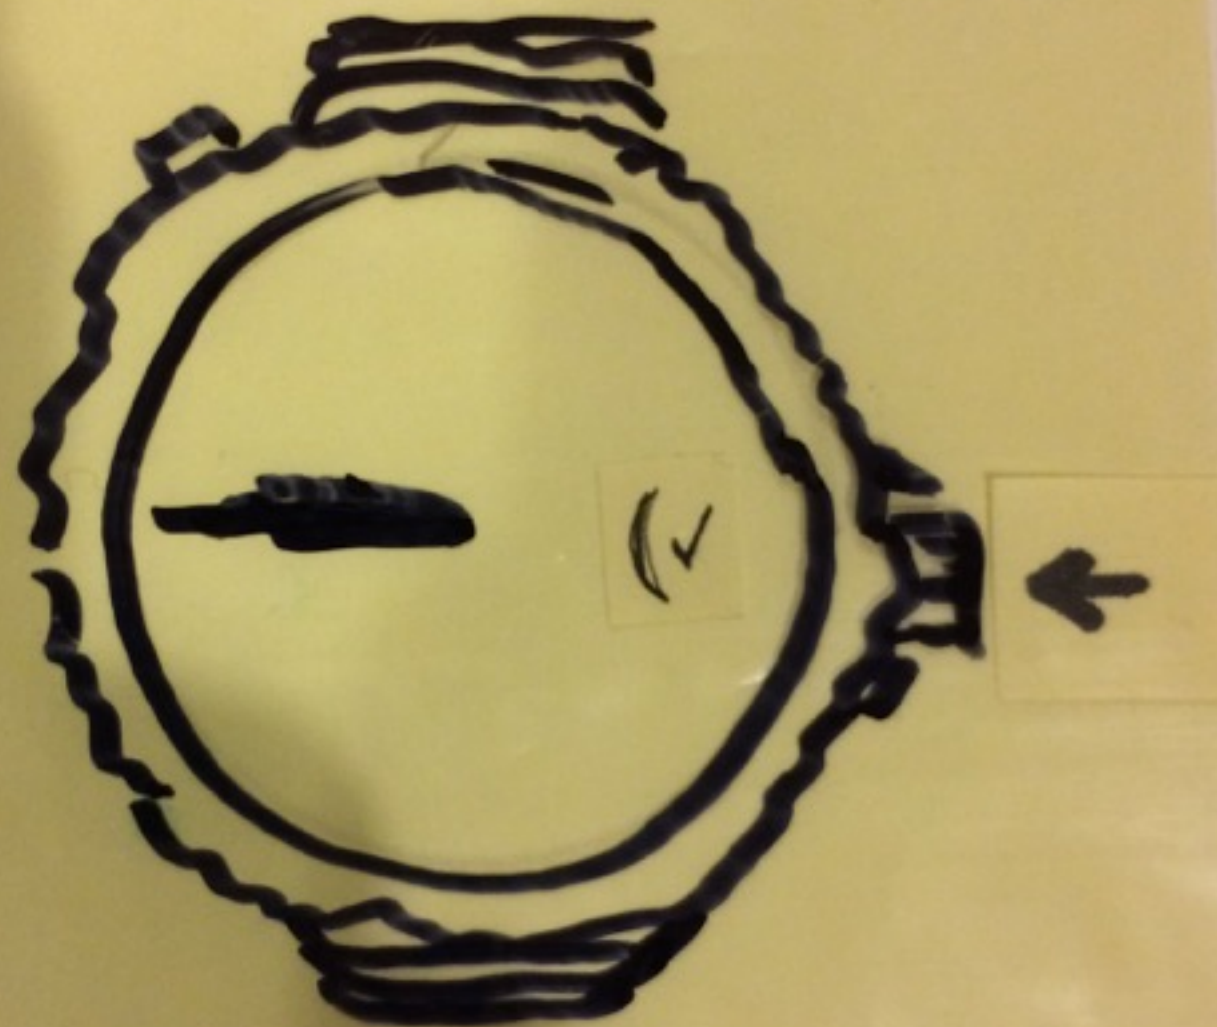

For longer
messages...

Bond rotates the outer dial to scroll the message.

Again, the message
can be dismissed by
pressing the right
button.

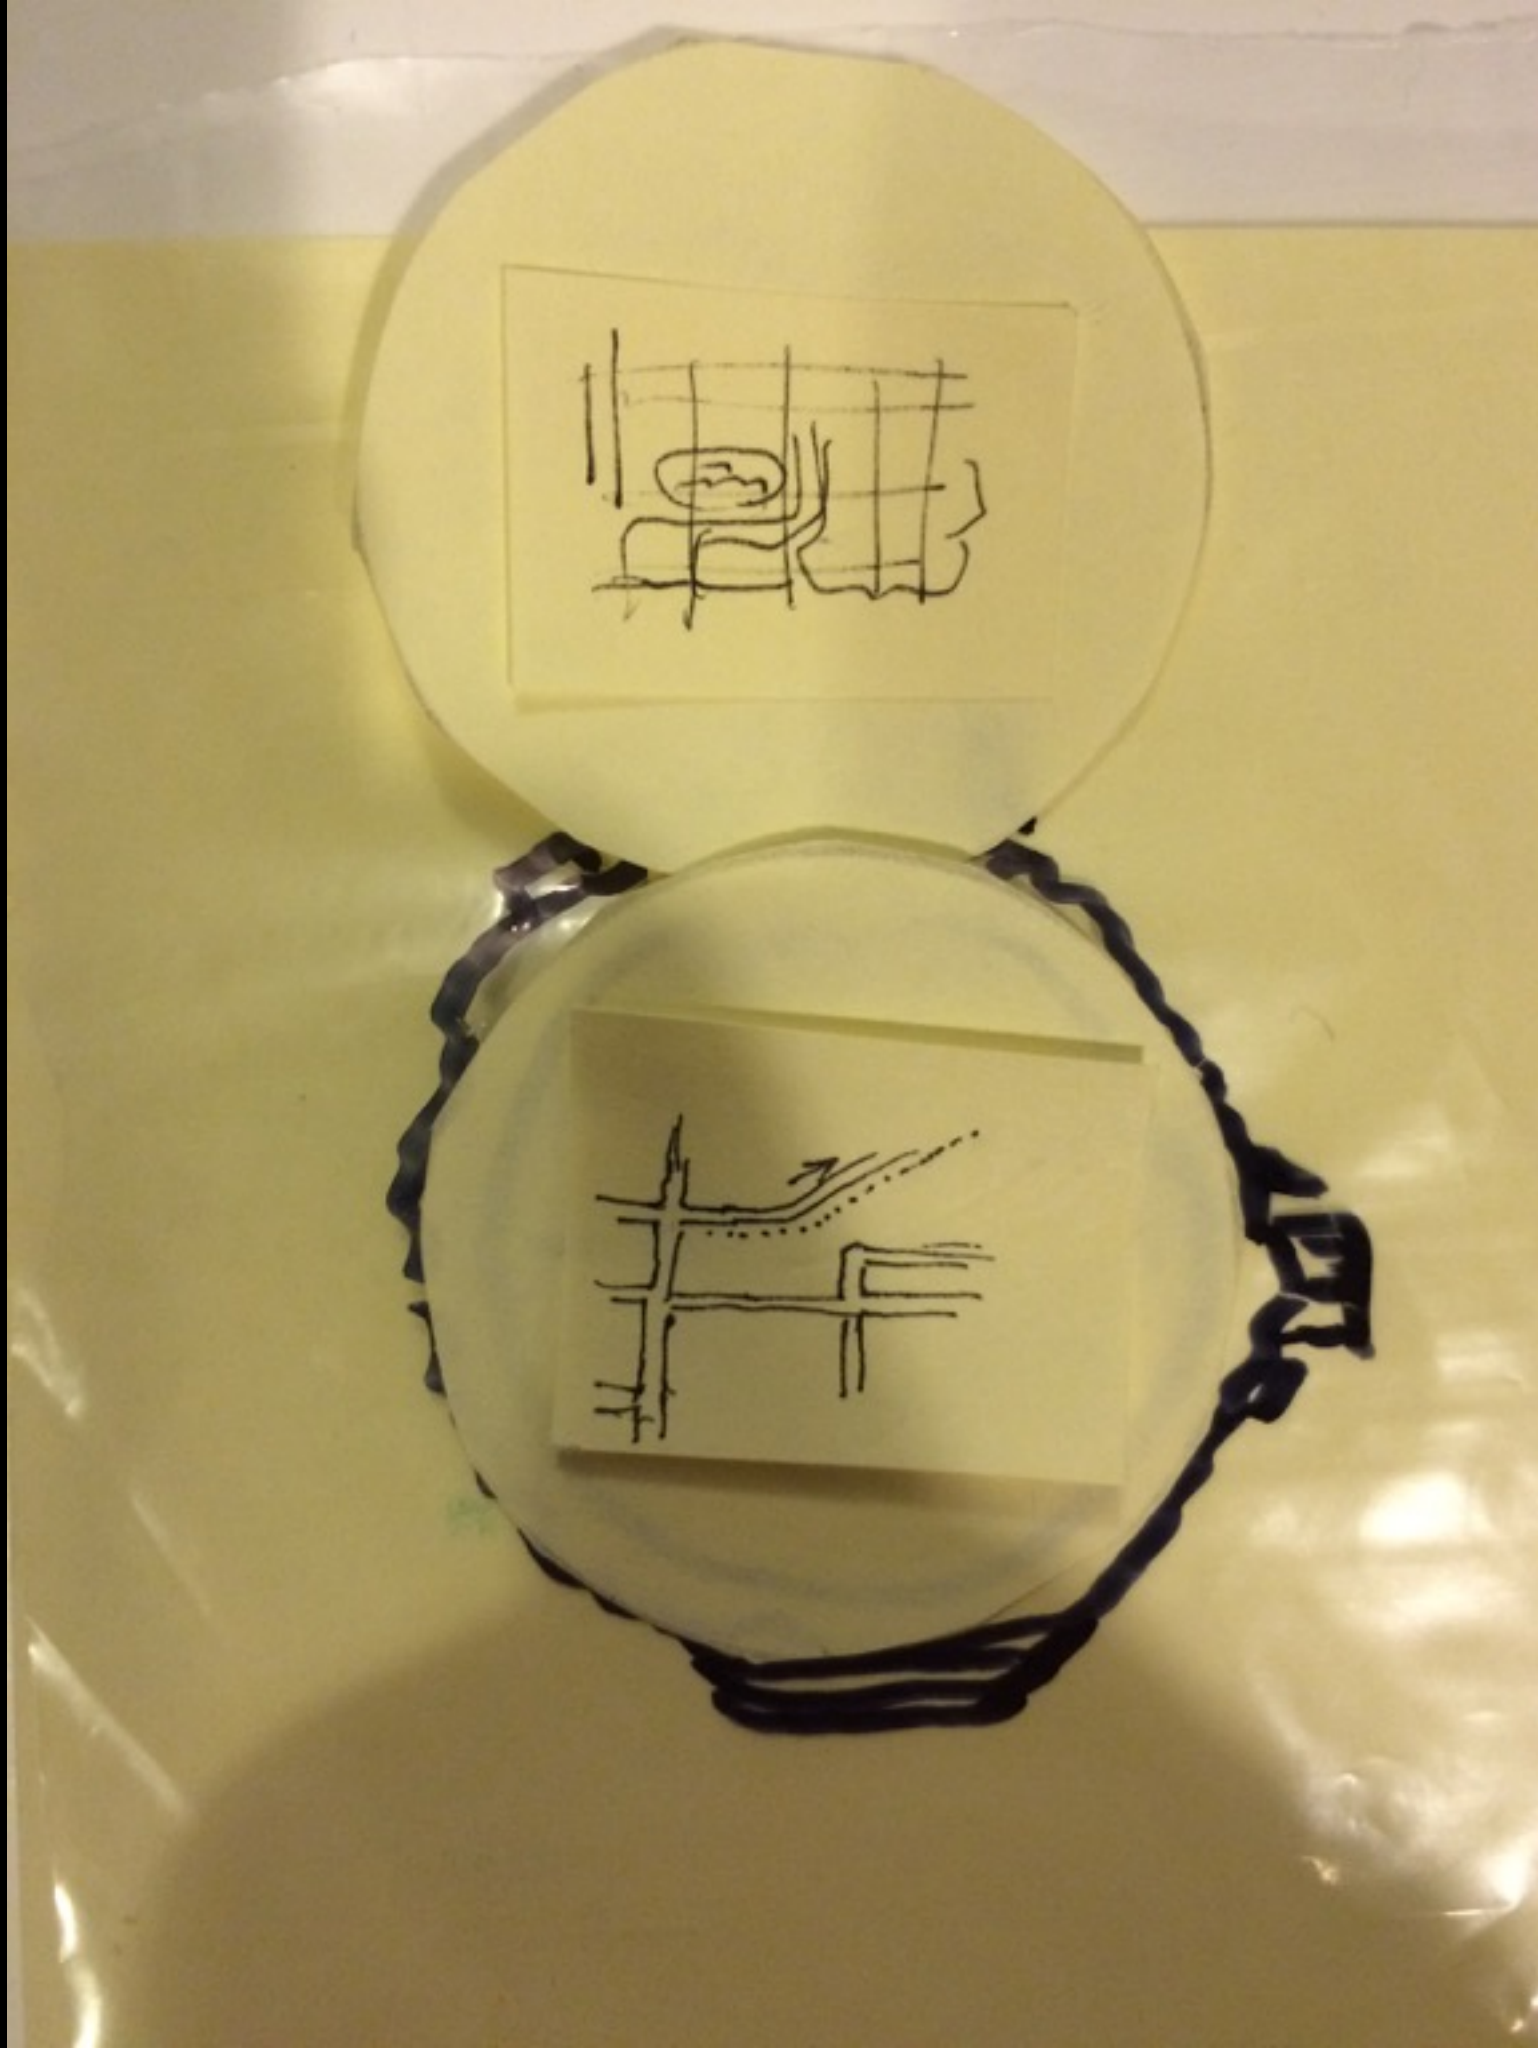

For rich multimedia messages, Bond presses on the bottom of the face.

The watch face flips
open...

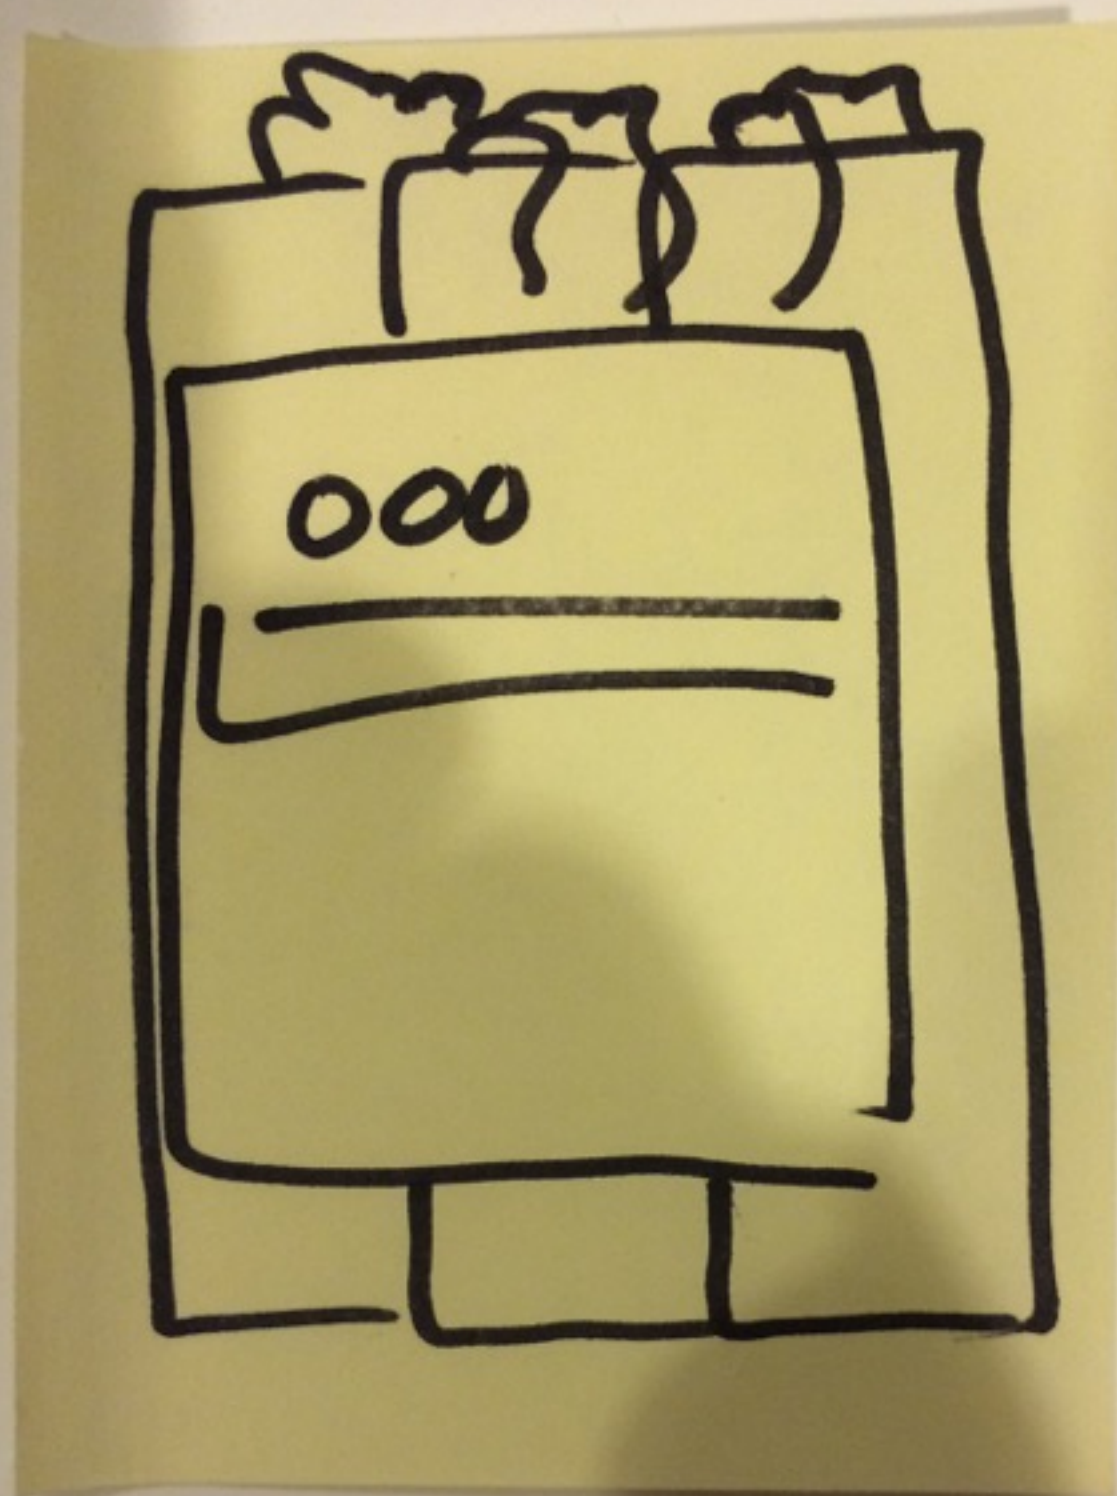

...and reveals the
message on color
displays.

Detonating Explosives

Explosives are placed.

The watch is brought close to the explosives and buzzes. The face has instructions on pairing the watch to the explosives.

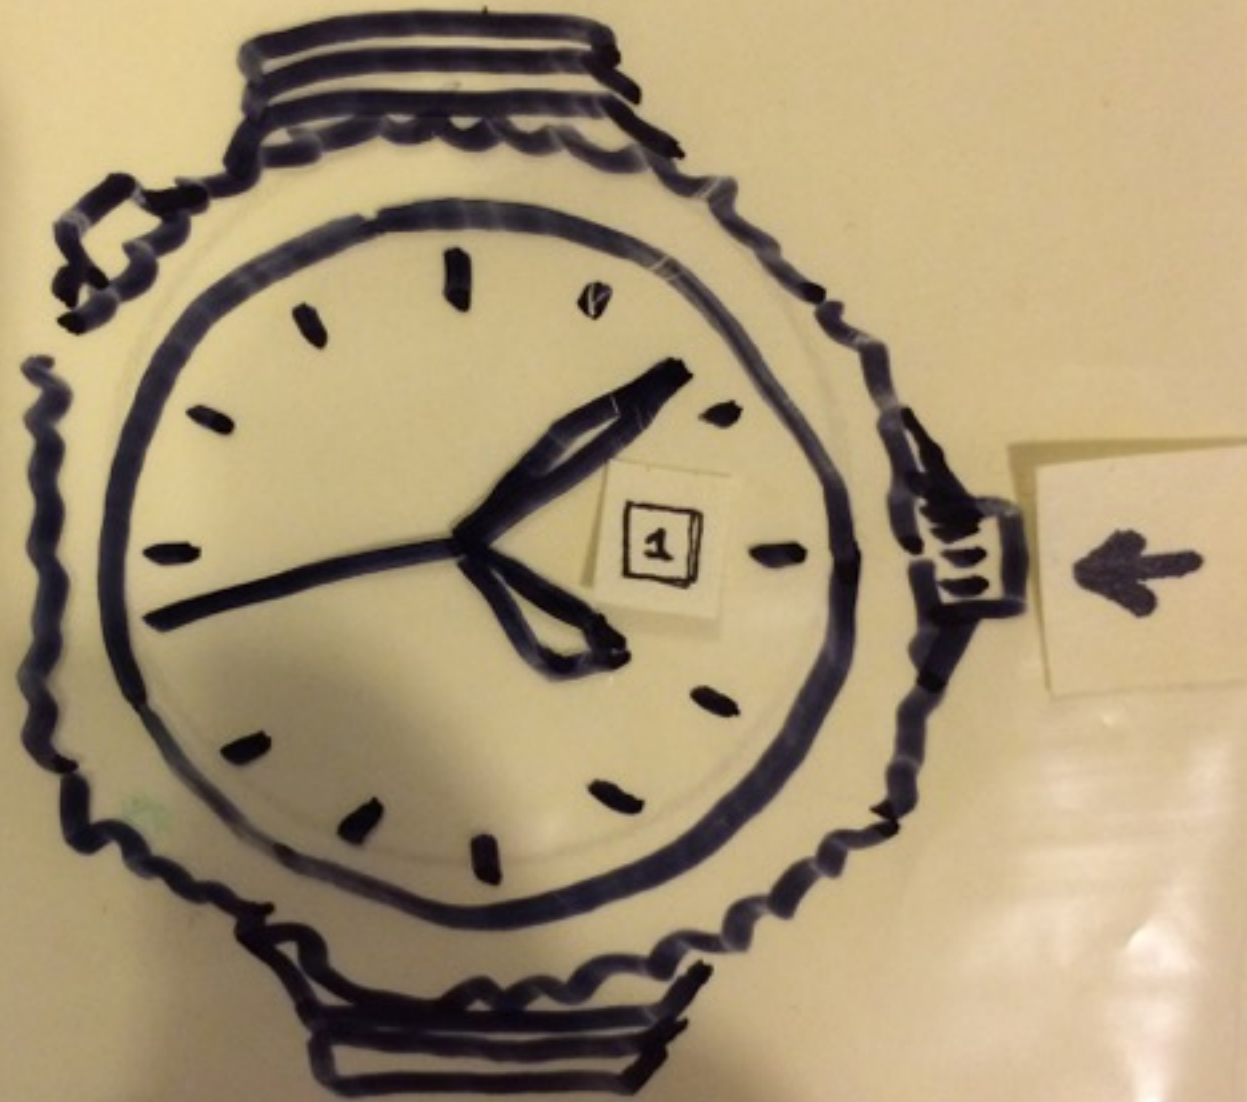

Bond pairs the watch with the explosives by pressing the right button.

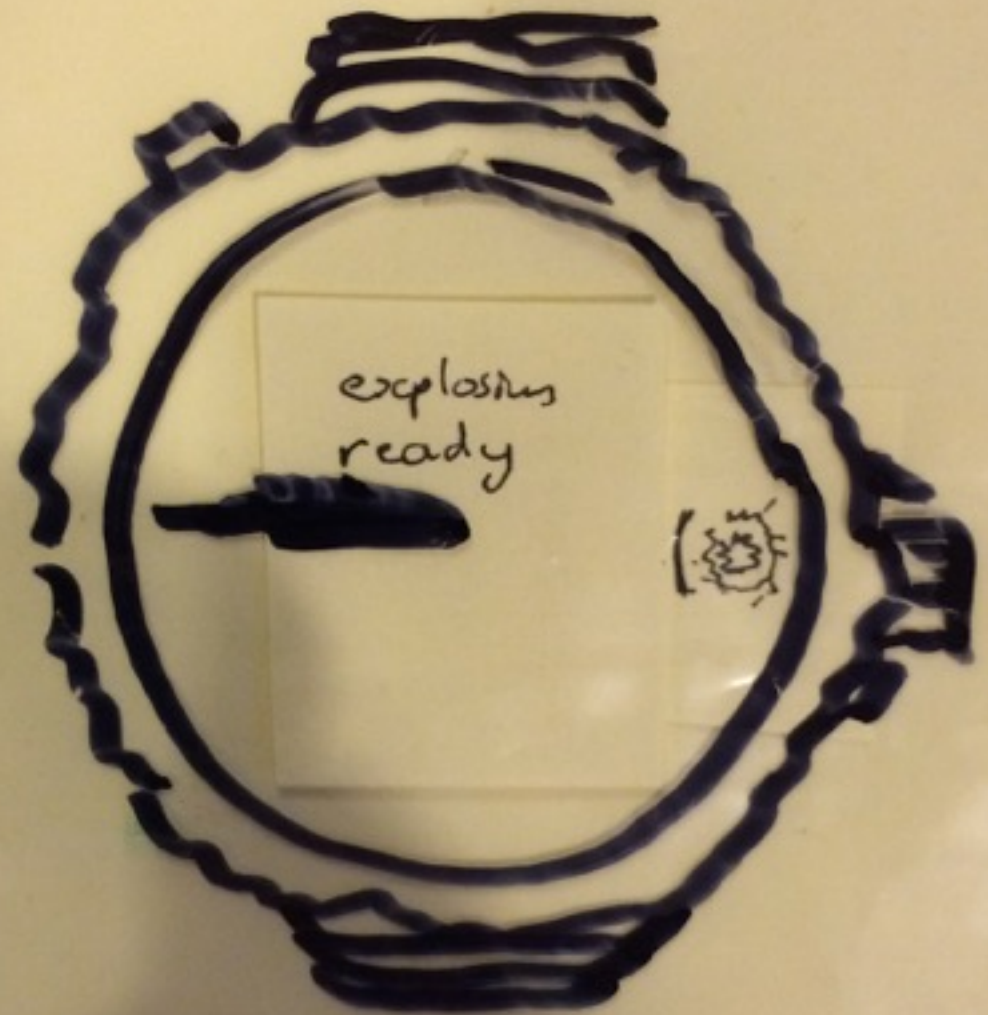

After some time the watch reverts to the regular watch face.

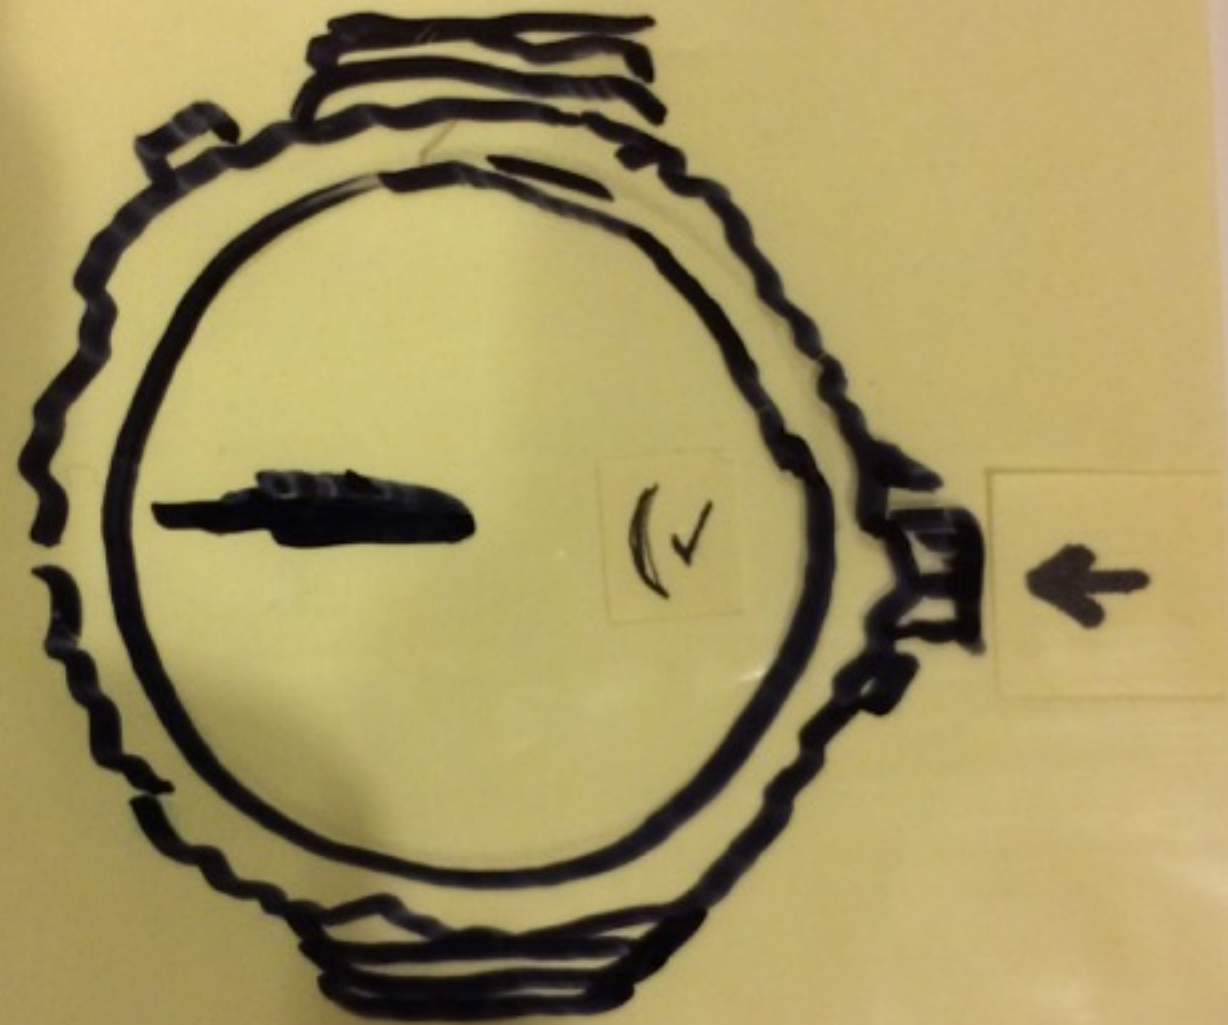

Bond presses the right button.

The watch shows that
the explosives are
ready.

Bond presses the right button again.

Boom...
